PROFIT

Protan Elmark is more than a company. It is a community of people with values who believe that through responsibility, commitment and passion you can change the world for the better – structure after structure, project after project, day after day.

In this story, each and every one of us is the author of change.

Welcome to our story.

In the heart of Greater Poland region, where tradition intertwines with modernity, there is a company that for more than three decades has been creating spaces where people and ideas can spread their wings. This story began in 1989 with Elmark Hale, to transform in 2008 into Protan Elmark, when we joined the family of the Norwegian group Protan AS. This evolution was more than a simple rebranding, but a symbolic bridge from tradition to the future, combining experience with innovation.

But our tale is not just about the company, it's about the people whose passion and commitment form its foundation.

Over time, from a handful of bold dreamers, we've grown into a strong crew of professionals.

The cooperation that is a daily routine at Protan Elmark is not limited to the relationship between employees. It reaches beyond our team to everyone who is part of our story: customers, suppliers, subcontractors, business partners. Together we create more than just products – we create values.

We are proud to provide financial and technical assistance to the Stęszew Public Library, spreading the love of reading among children and young people.

At the outbreak of war in Ukraine, we provided housing for three families of employees of our business partners who, for obvious reasons had left the country. We also provided field hospital, which was essential for the rescue of people.

During the COVID-19 pandemic, we developed and implemented, with the cooperation of medical units, a vaccination tent that served people of Greater Poland.

This Christmas, we brought a special surprise for the dear kids at Stęszew Special School. Santa Claus paid a visit, bringing educational gifts to enrich their learning journey.

We've established a bee yard in our mini-farm. This sweet initiative has allowed us to share nature's treats from our phacelia fields with our team, partners, the wonderful kids of Stęszew's Special School, and the seniors from the local Retirement Home.

At Protan Elmark, responsibility isn't just a catch phrase It's the big and small actions we take that truly make a difference in our world.

ALL ABOUT PASSION

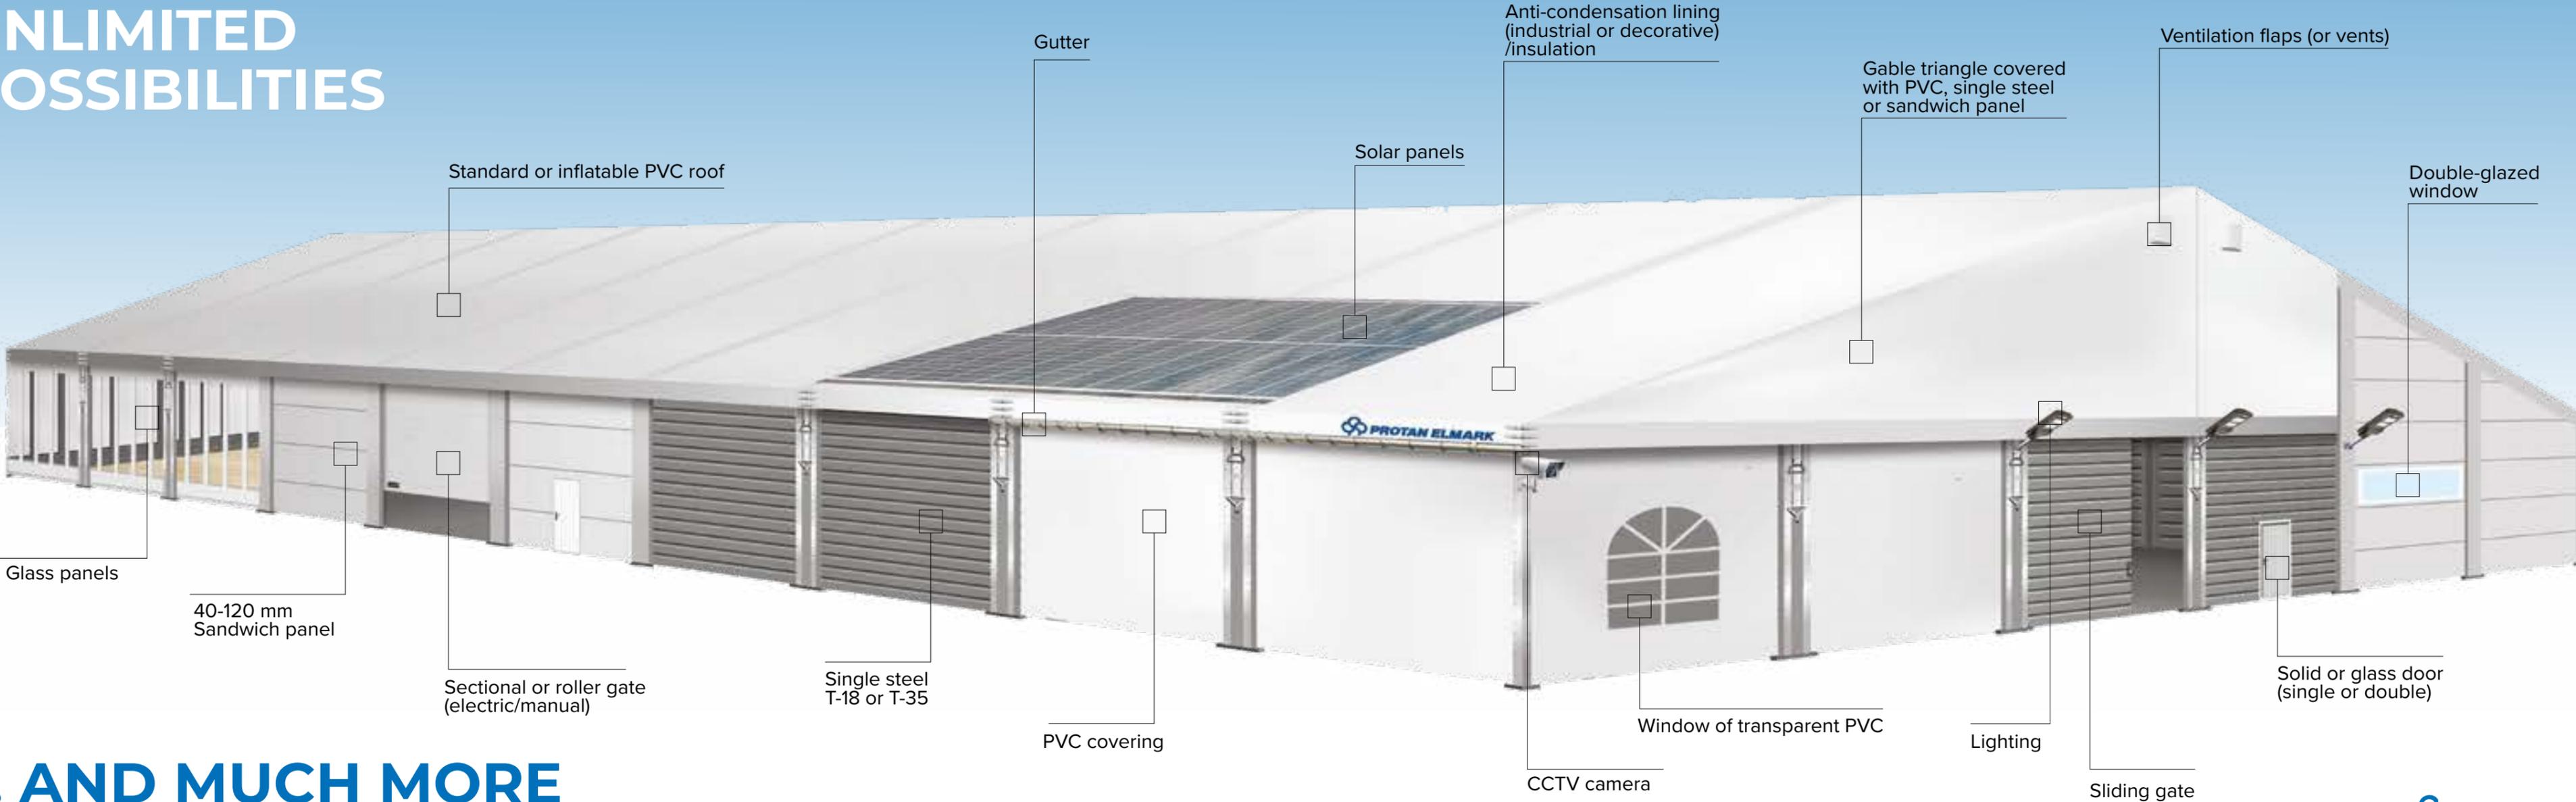

At Protan Elmark Company, we are proud of the fact that our employees are not just staff, but a part of our family. Many have dedicated over 15 to 25 years of their professional lives to our company. Moreover, our team is not just experienced, but also deeply committed and passionate about their work.

Their commitment and dedication is reflected in the superior quality of our products. The passion that fuels our team's efforts is the same force that drives us to continuously innovate and improve our solutions.

Our ultimate aim is to offer you the opportunity to grow your business. We achieve this by providing exceptional temporary structures.

UNLIMITED POSSIBILITIES

... AND MUCH MORE

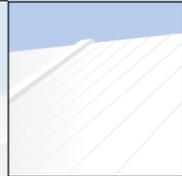

STRUCTURES FOR INDUSTRY

PVC ROOF COVERING

European-sourced, flame-retardant materials; available in a variety of weights and colours, including an opaque option that guarantees blocking out sunlight; strong enough to withstand extreme weather conditions, from the icy Arctic Circle to the scorching African deserts.

GROW YOUR BUSINESS FAST

Our versatile temporary buildings are essential for a wide range of industrial uses. They not only serve as reliable and durable warehouses, providing secure storage for products and production materials, but also can be adapted into production halls and integrated office spaces. With all of these functions conveniently housed under one roof, our temporary structures are the perfect solution for any industrial operation.

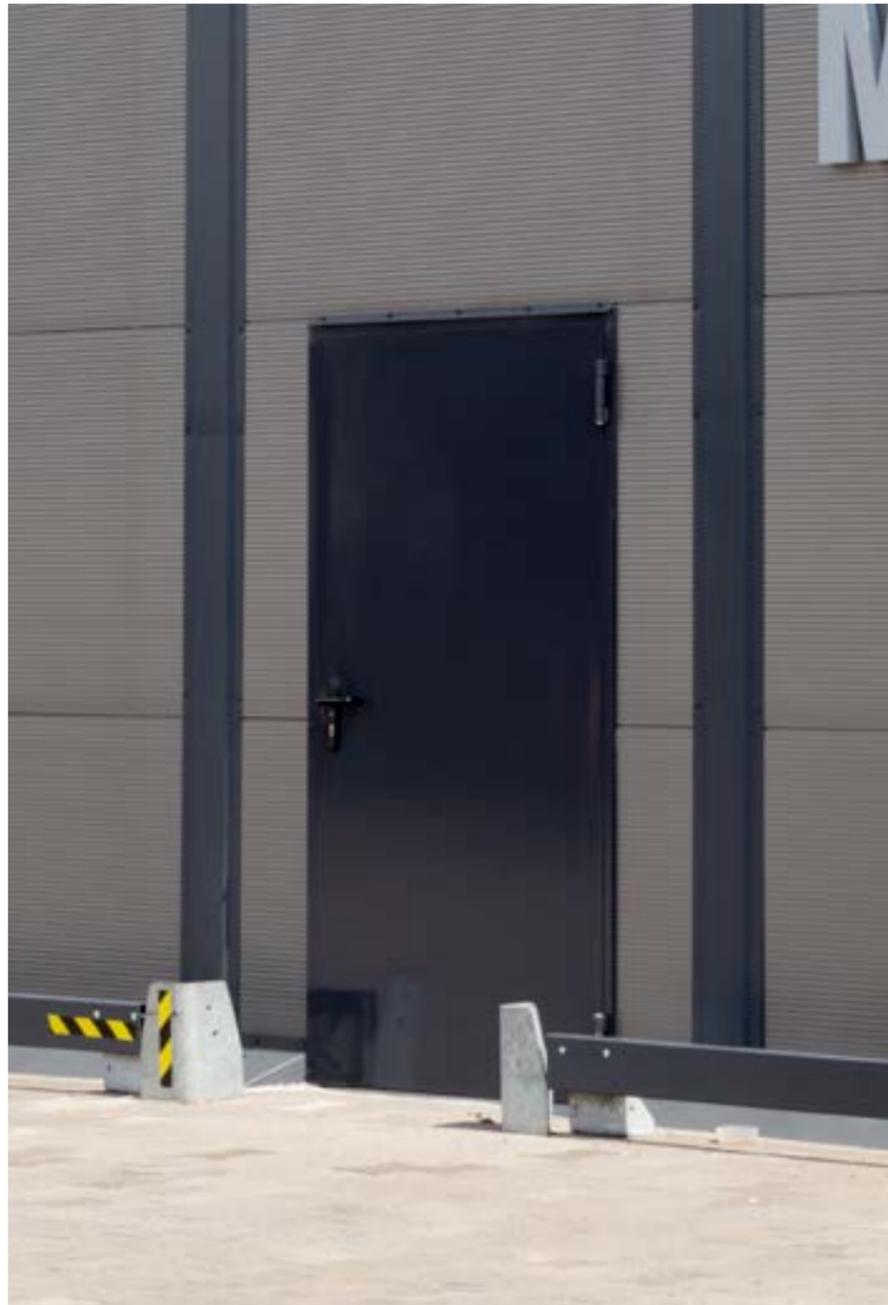

VENTILATION
Calculated based on the structure's cubic space and purpose, employing either mechanical methods or natural air circulation, provides air exchange inside the building.

BRACING SYSTEM
Crucial to the strength and safety of temporary buildings; protects against wind and snow loads, boosting building resilience.

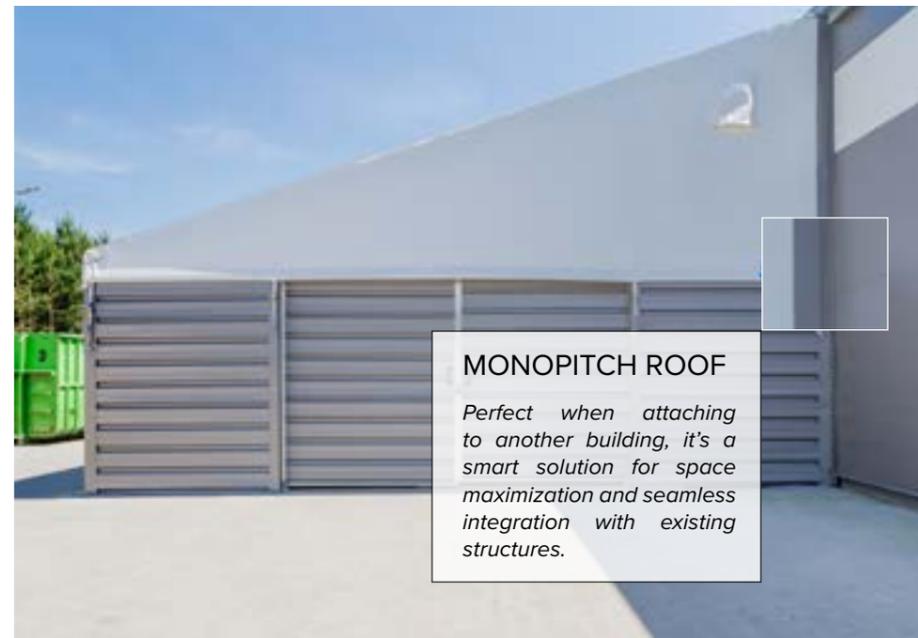

SANDWICH PANEL
As a wall covering, sandwich panels not only add a sleek aesthetic to buildings, but also offer superior thermal insulation – their insulating properties protect your space from adverse weather conditions, keeping it comfortable regardless of the season.

TRANSPARENT PVC

Ideal for various temporary structures, particularly event halls; serving as windows, it allows light in, provides interior visibility, and offers outside views.

MONOPITCH ROOF
Perfect when attaching to another building, it's a smart solution for space maximization and seamless integration with existing structures.

STRUCTURES FOR SPORTS

PASSIONATE ABOUT SPORTS? SO ARE WE!

Protan Elmark provides superior temporary structures tailored for the sports industry. Perfect for tennis courts, ice rinks, sports halls, gyms, or horse riding arenas, these structures fulfil all safety requirements for sport and recreation. For sports demanding significant height above the playfield, we recommend our hipped roof structures. Enjoy your passion in absolute comfort and safety with Protan Elmark!

INSULATION LINING
Composed of two PVC layers with an insulating foil screen in between, is typically installed on roofs and often paired with sandwich panel on walls for enhanced insulation.

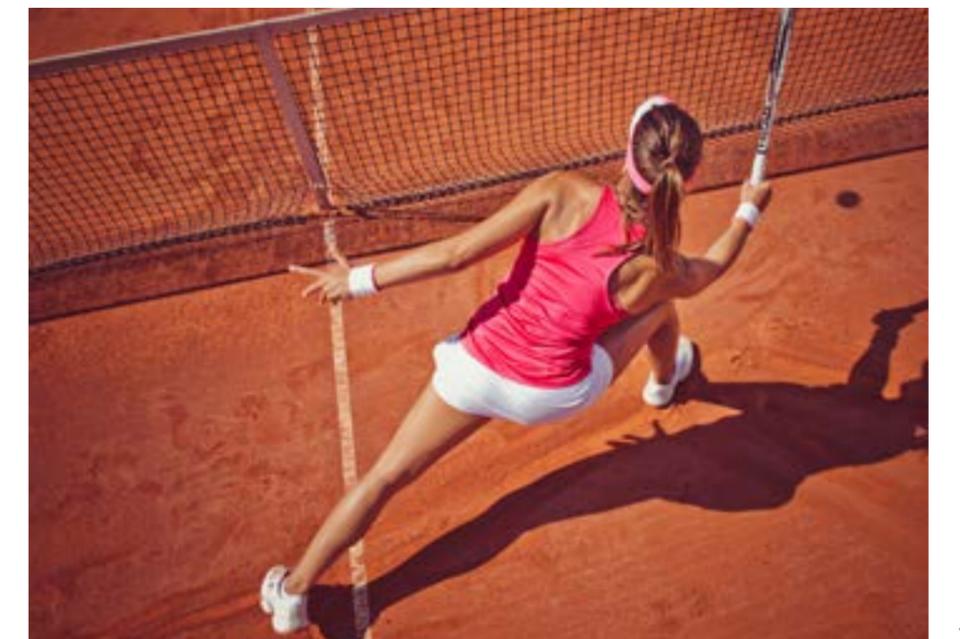

SPORTS STRUCTURES: FLEXIBILITY & OPTIMAL CONDITIONS

At Protan Elmark we recognize that every sport has its own specific demands and necessities. Therefore, we have designed our sports structures to be highly flexible and capable of being modified to accommodate a diverse range of sporting activities.

Our sports halls fuel sporting passion by providing versatile and weatherproof spaces for training and competition. Train hard, play with passion and experience the excitement of sport in optimal conditions.

HIPPED ROOF
Top choice for sports demanding more height space; especially suited for games like volleyball or tennis, but not only, where the playing field needs to exceed 8 meters in height.

**EXPERIENCE THE GAME
IN OPTIMAL CONDITIONS WITH
OUR SPORT STRUCTURES**

STRUCTURES FOR ENTERTAINMENT

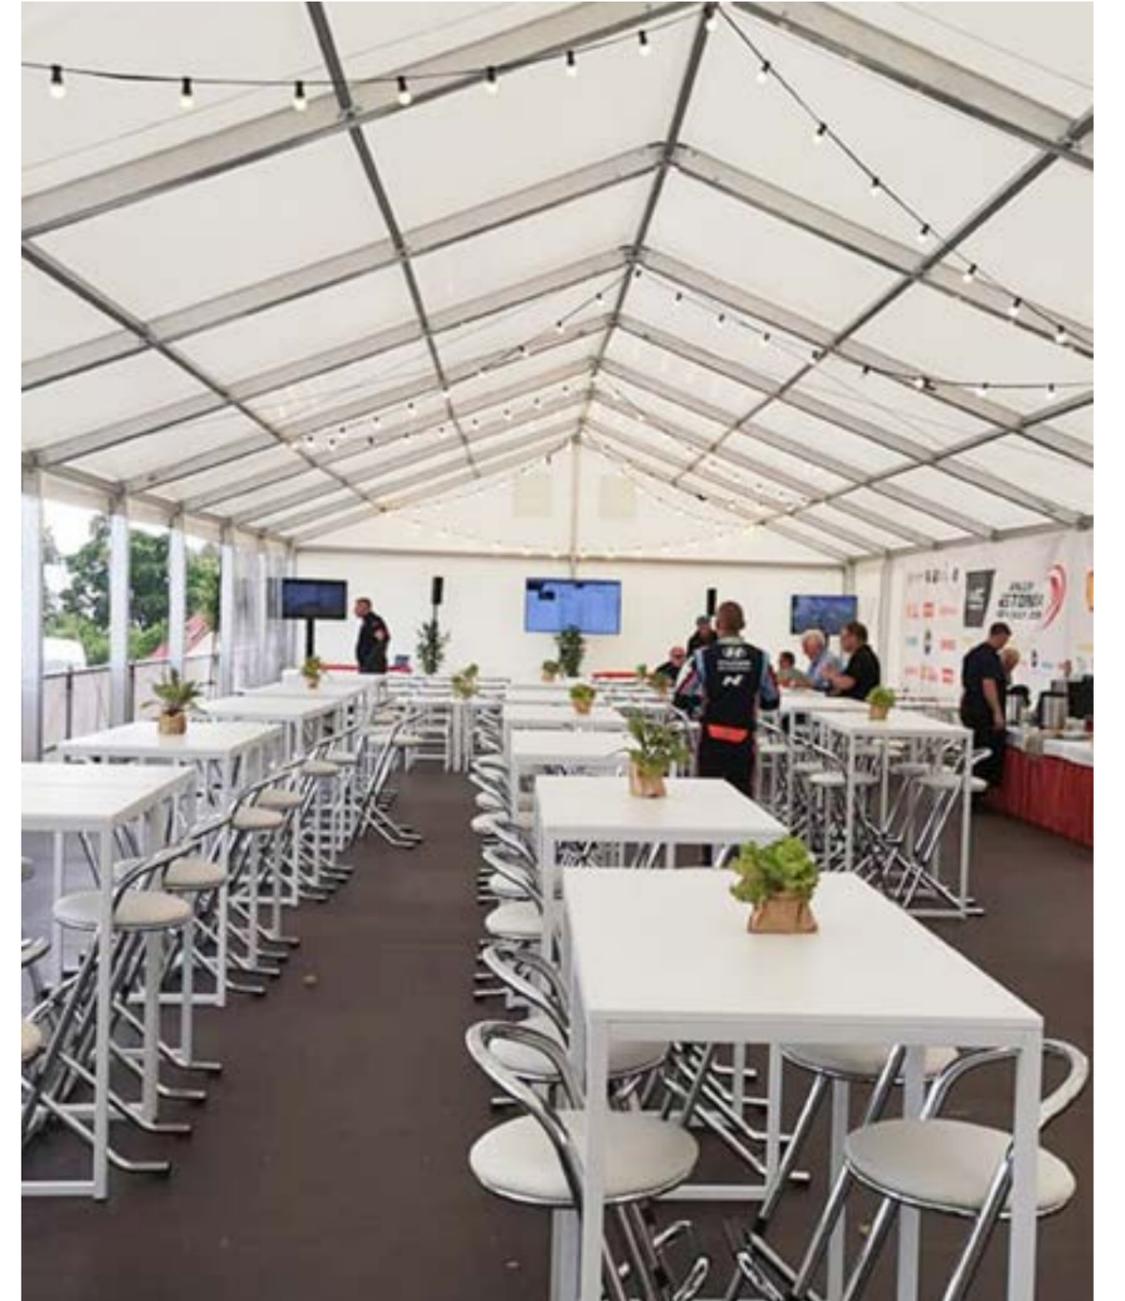

A MEMORABLE VENUE FOR YOUR BIG DAY

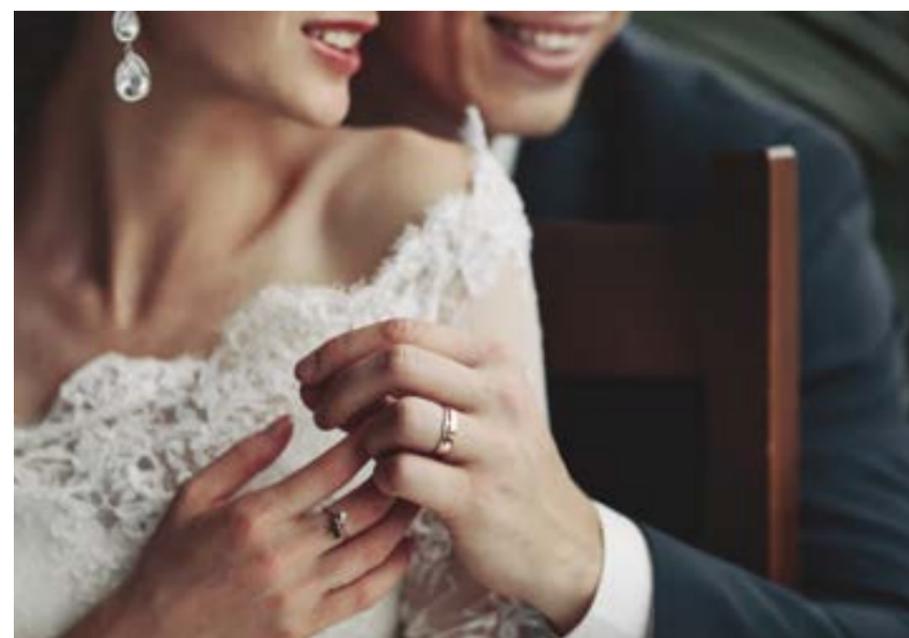

Protan Elmark's temporary structures provide the perfect backdrop for memorable events, including the all-important wedding day. With their elegant design and chic style, they're sure to make your event stand out. Every detail is carefully crafted to create a unique atmosphere, ensuring both comfort and an unforgettable experience. Despite their stunning appearance, our halls are robust and can withstand unfavourable weather conditions.

Make your special day even more unforgettable with Protan Elmark!

PERFECT COLOUR MATCH
Our wide colour palette offers limitless options – whether you are looking for the perfect match or a unique combination that reflects your brand identity.

GLASS WALL

For a spectacular finish of your event structure, use glass panels, set in aluminium or plastic frame, they can be combined with different coverings for a unique look.

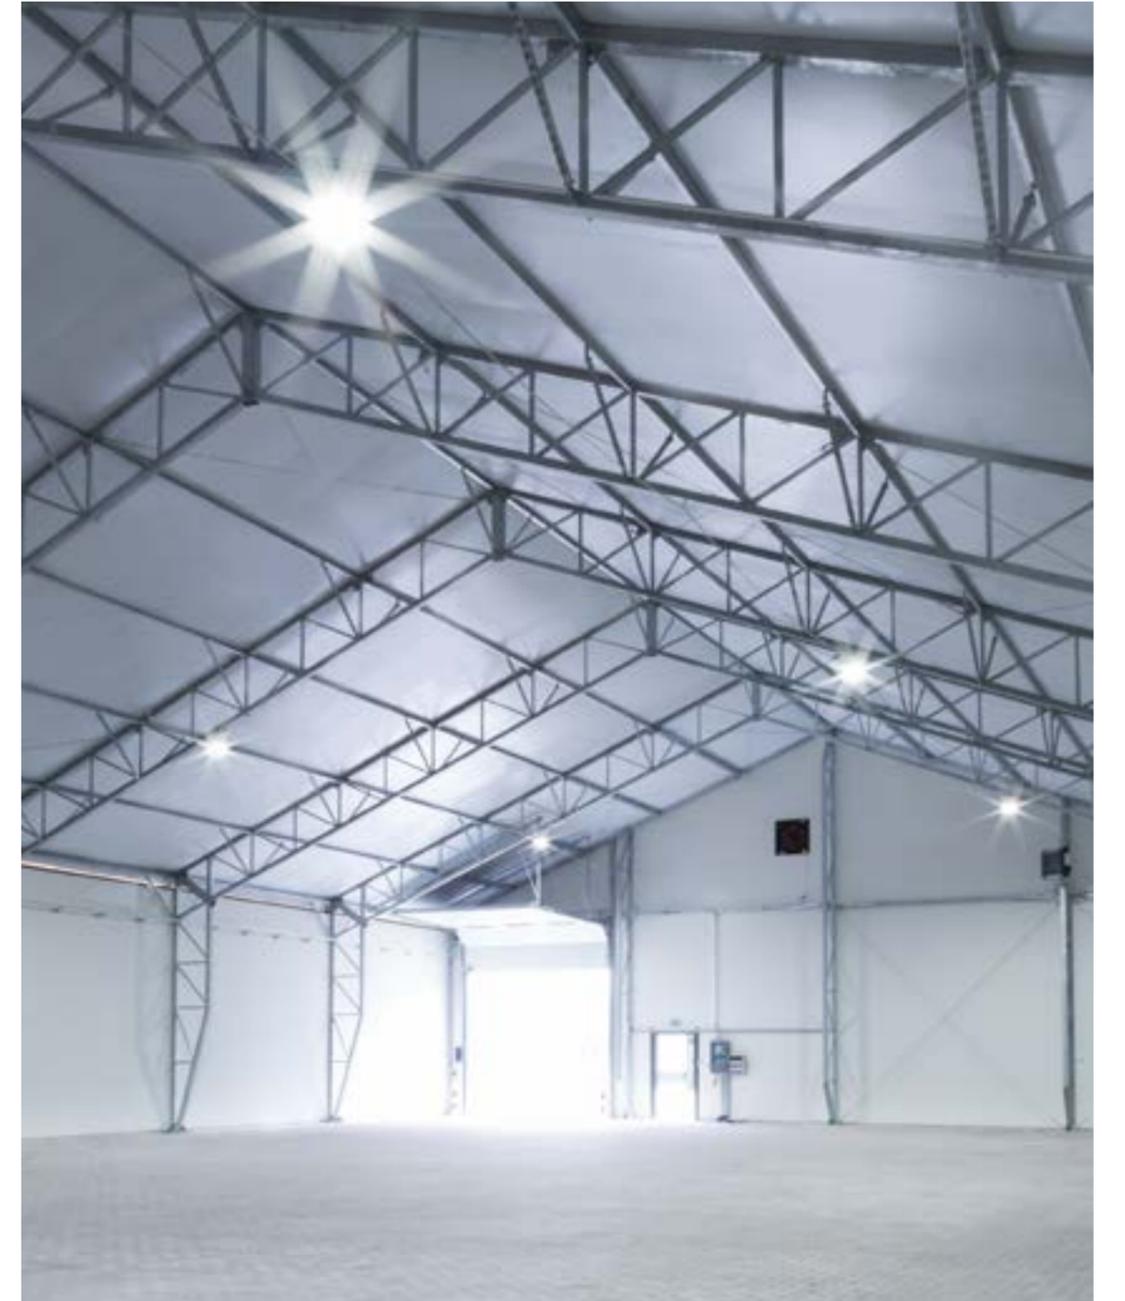

**STEEL
MULTIPURPOSE
STRUCTURES**

DISCOVER OUR STEEL STRUCTURES

Steel structures offer excellent strength and durability, making them ideal for withstanding heavy snow loads and allowing for wider spans. This makes them the perfect choice for large halls and warehouses. Their design eliminates the necessity for cable bracings, freeing up valuable space and maximizing your storage height. Therefore, for those in need of larger, robust, and highly efficient storage solutions, steel structures are the perfect choice.

METAL FLASHING
Used to protect the joints of a structure from unwanted water intrusion. Thanks to the variety of materials available, it not only fulfils a practical role, but can also have a decorative function, giving your building a distinctive look.

ALL-WEATHER, ALL-PURPOSE STEEL STRUCTURES

Steel storage halls are perfect whatever the weather, 365 days a year. They are stable, durable and allow the safe storage of various types of products – from food to large-scale equipment.

Steel agricultural halls serve multiple functions and are ideal for both small and large farms. They can function as temporary storage for grain, straw, and fodder, act as year-round housing for livestock, or even as garages for farming machinery.

Steel-framed industrial halls are a robust solution that ensures high durability even in extreme weather conditions. For year-round facilities, we recommend wall cladding made of sandwich panels. In addition, the use of an insulated roof will provide adequate thermal conditions.

TRUSS

A key component of steel halls, a truss is a network of straight, interconnected bars forming a triangular structure. It's a fundamental element in design of steel structures.

**ADDITIONAL
EQUIPMENT**

ANTI-CONDENSATION LINING

serves to prevent condensation build-up, ensuring an optimal environment for the stored materials, but also, for example, in sports or event structures (in decorative version); we were the first company on the market to apply it in temporary structures.

GATES

- sliding gates
- sectional gates
- roller shutter doors
- high-speed gates
- automatic or manual gates

WINDOWS

- aluminium / PVC
- double or triple glazed
- tilt type
- available in many colours and sizes
- foil windows in PVC structures

DOORS

- steel
- aluminium
- PVC
- glazed or solid
- single or double leaf
- various types of lockings (e.g. antipanic push bar)

GUTTERS

- plastic gutters
- steel gutters
- heated guttering system

VENTILATION

- mechanical ventilation
- gravity air circulation
- air vents

LIGHTING

- traditional lighting
- LED flood lights
- emergency evacuation system
- electrical installation with documentation
- switchboard

ENTRANCES

- curtains
- roll-ups

BOTTOM FLASHING

- corner flashing
- standard bottom flashing
- customized bottom system
- finishing around the doors and gates

LINK TUNNELS

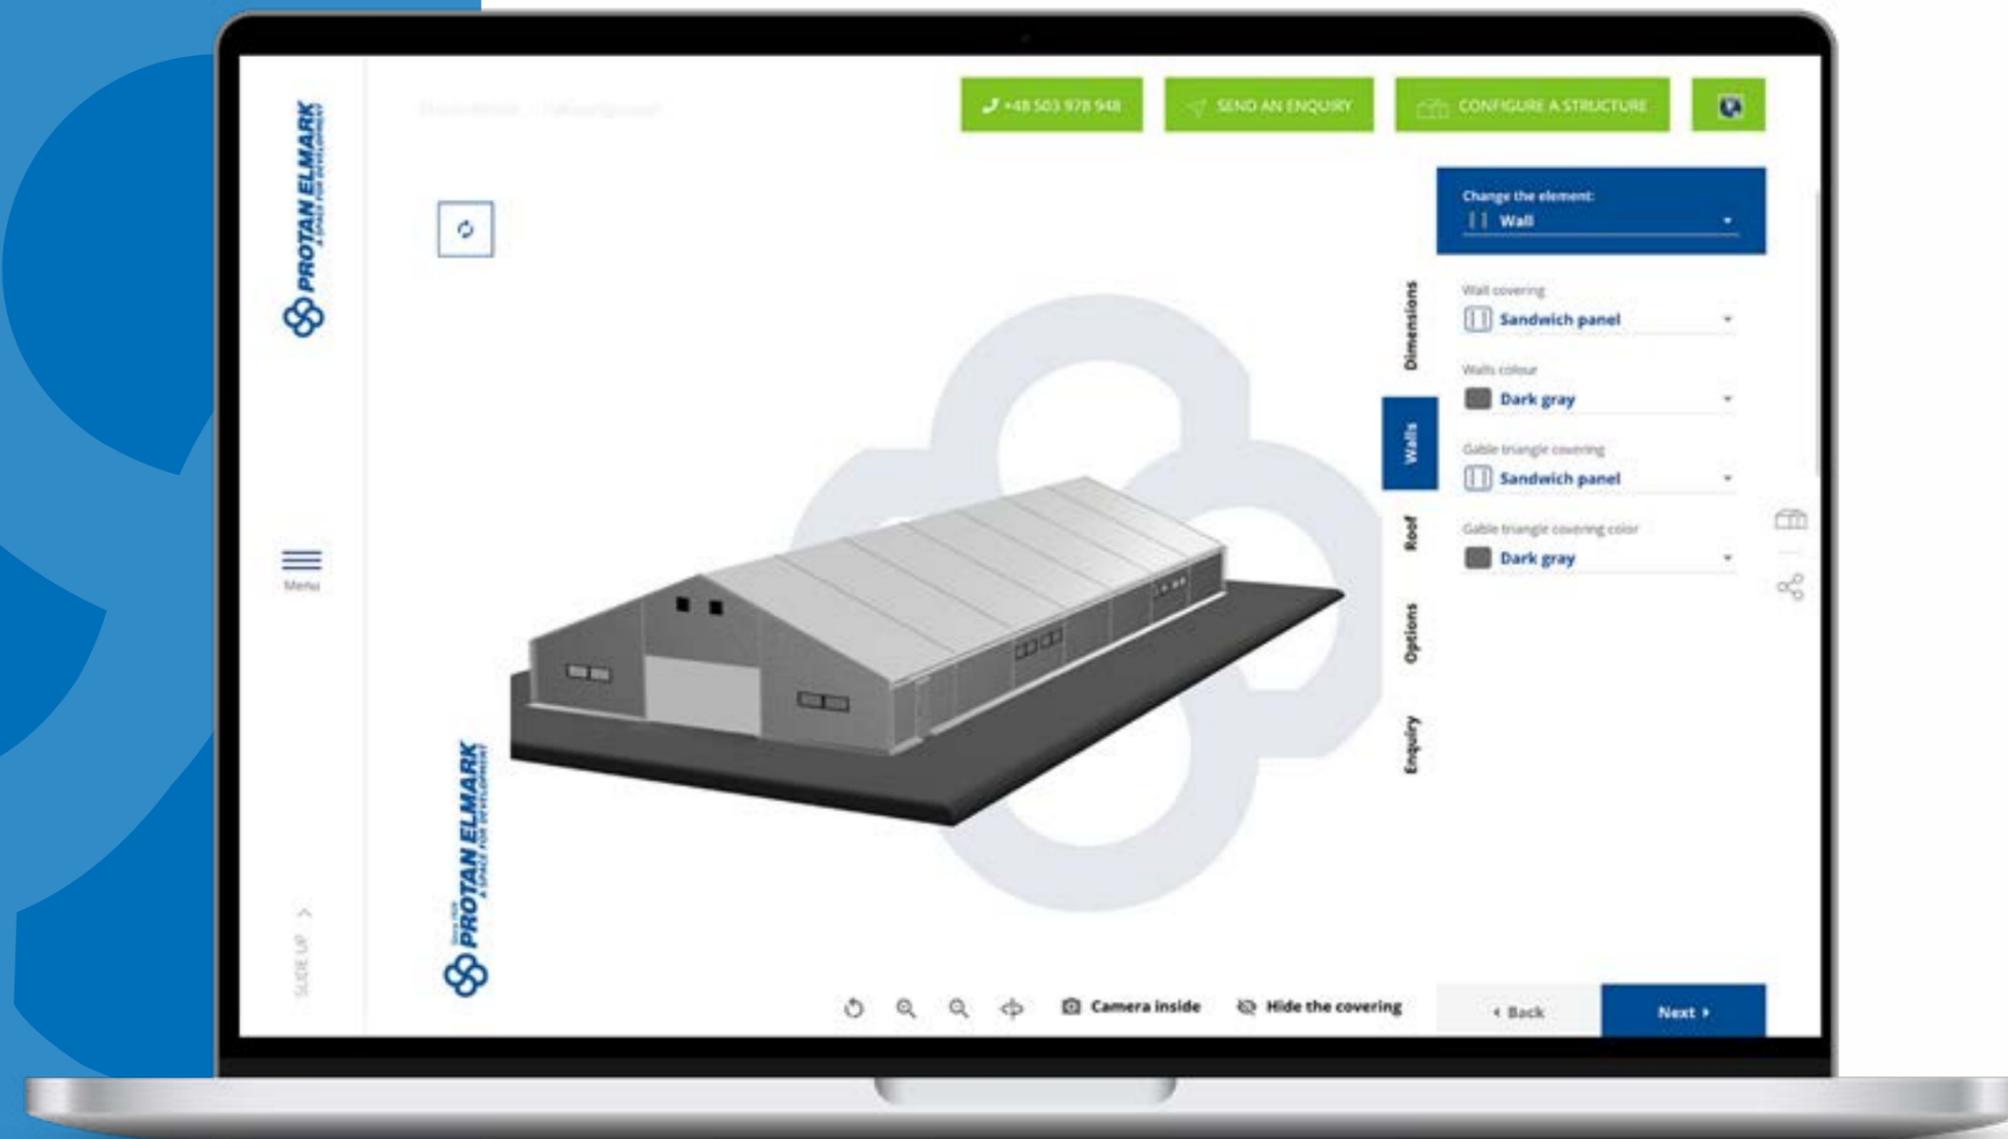

Build your own structure!

Use our innovative 3D configurator tool

Wondering what a 15 m × 40 m × 5 m hall will look like? Considering whether it's better to use PVC or metal sheet? Or maybe you're thinking about adding windows and doors? Unsure about the colour – green, blue or maybe classic white?

Our Temporary Structure Configurator is your ultimate guide, capable of generating over 1,000 unique hall variants! Welcome to our website, where you can freely explore and visualize your dream structure.
